**Priority**

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

**Response to Arguments**

Applicant's arguments with respect to claims 1-3 have been considered but, after further searching and evaluating the claims, are moot in view of the new ground(s) of rejection. The Finality of the previous rejection has been withdrawn.

**Claim Rejections - 35 USC § 112**

Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for those particular steps as disclosed on page 3 lines 24 and 25, does not reasonably provide enablement for any type of secondary aromatic amine as claimed. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make any use the invention commensurate in scope with these claims.

Case law holds that applicant's specification must be "commensurately enabling [regarding the scope of the claims]." See *Ex Parte Kung*, 17 USPQ2d 1545, 1547 (Bd. Pat. Appl. Inter. 1990). Otherwise **undue experimentation** would be involved in determining how to practice and use applicant's invention. The test for undue experimentation as to whether or not all compounds within the scope of claims 1-3c can be used as claimed and whether claims 1-3 meet the test is stated in *Ex parte Forman*, 230 USPQ 546, 547 (Bd. Pat. Appl. Inter. 1986) and *In re Wands*, 8 USPQ2d 1400 (Fed. Cir. 1988). Upon applying this test to claims 1-3, it is believed that undue experimentation **would** be required because:

(a) *The quantity of experimentation necessary* is **great** since claims 1-3 read on any type of secondary aromatic amine such as that which is claimed while not necessarily applying the particular steps as noted on page 3 lines 24 and 25 of the specification.

(c) There is an **absence of working examples** concerning the steps comprising any type of secondary aromatic amine other than those as disclosed on page 3 lines 24 and 25 of the specification.

It is noted that although the CCPA has criticized the use of the characterization "too broad" or "undue breadth"....however, an application whose claim(s) are of a breadth which are not adequately supported by its specification is in violation of 35 USC 112, first paragraph. In re Borkowski et al., (CCPA 1970) 424 F2d 904; In re Wakefield, (CCPA 1970 422 F2d 897; In re Hammack, (CCPA 1970) 422 F2d 897. In light of the above factors, it is seen that undue experimentation would be necessary to make and use the invention of claims 1-3.
